Languages/Frameworks

HTML	CSS	JAVASCRIPT	TYPESCRIPT	
REACT	NEXT.js 12/13	JQUERY	SASS	GIT

Libraries

REDUX	SEO	VITE	CHART.JS	AXIOS	AOS
GSAP	FIREBASE	MUI	LEAFLET		

UX/UI

Responsive Web Design	SEO principles	Adobe XD
Adobe Photoshop	Adobe Premiere Pro	FIGMA

EXPERIENCE

Intern Frontend Developer

Cognisys

09/2023 - 12/2023 Remote

<https://cognisys.io/>

During my internship at Cognisys, I had the valuable opportunity to contribute to the frontend development team, working on projects that enhanced my skills and understanding of modern web development practices.

PROJECTS

Velnes.mk

08/2023

<https://velnes-mk.vercel.app/>

The project goal is to create an app for beauty salons, where clients can make appointments, cancel appointments, see salon reviews from other clients, and see all information available for the chosen salon(something like booking.com for beauty salons). This project is built in **React**, with **TypeScript**. For styled systems, that use **styled-components**. The client requirement was for this app to be mobile only.

Street Artists

03/2022

<https://street-artists-zeta.vercel.app/>

The purpose of this project was to practice and do a small review of my JavaScript learning. The main idea was to create a mobile app for street artists and customers where they could meet each other. An artist can put their art up for auction. The customer can bid in the auction. An API has been added for simulation where it simulates another guest placing bids on an auction. This project is built in **vanilla JavaScript**. **SASS** was used for the styling system.

Online Shop

01/2023

The purpose of this project was to practice and do a small review of my Next 12 with TypeScript. The main idea was to create an online shop where customers can look at available products that the shop offers. This project is built in **Next 12** with **TypeScript**. **Bootstrap** was used for the styling system.
